

Crude Oil Machine Learning Trade

Decentralized Finance Platform Integration

WHITE PAPER: APRIL 4, 2022

Together, XOIL and WOIL constitute the first release in a suite of at least 6 decentralized crypto related projects 'private by default' from our development team.

This first offering will begin selling April 4th, 2022 and the suite of projects will be released in entirety over approximately the following 24 months.

The primary goal of the first project is to merge and exploit the advantages of a private decentralized crypto platform with a highly sophisticated and market-proven crude oil machine learning trade software.

This machine trading software has been in development for 6 years; the white paper is found here:

<https://compoundtrading.com/epic-v3-3-crude-oil-machine-trade-software-white-paper-march-28-2022-update/>

To accomplish this goal, we have secured license to the EPIC oil machine trading platform to be tokenized on a DeFi network using the most advanced available private crypto ecosystems. In doing so we will provide crypto investors access to state of the art machine learning trade technology and ROI performance not otherwise attainable to most investors.

The oil trading project is divided into two tokens. XOIL is the standard token with a capped supply and smaller minimum entry. WOIL is a 'whale' token for larger investors and will have no capped supply.

The tokens will be launched and issued on the fully privatized DERO crypto network to maintain end to end privacy.

Payment for XOIL and WOIL tokens will be executed using XMR as it is the most liquid privacy coin available at the time of launch. Exchange between XMR and XOIL/WOIL will be privately managed by our support team. Think of the token as a proof of stake in the trading software.

Using this structure provides us the ability to guarantee liquidity directly from our treasury to investors at the appropriate listed token value. This structure also prevents 'pump and dump' scenarios from occurring as the value of the token can be set to solely reflect the software returns, invested capital and the number of issued tokens. In this way, large buy and sell orders will not cause significant swings in the XOIL/WOIL token price. Designing the project in this manner creates a lower risk, value-type investment instrument rather than relying on speculation to propel returns.

To liquidate tokens to XMR or other applicable, investors simply contact our support team directly. Tokens are then cashed out from the treasury at the current 'Guaranteed Cash Out Price' less exchange and transfer fees. This price will be updated daily on the project's website.

The price of the token is directly proportional to the software returns and is fully backed by the treasury at the stated cash out price. Rewards are not paid to token holders as a % of return but instead the value (price) of the coin increases to reflect the software returns.

The total supply will be established and locked when the pre-sale ends. It will be equal to the number of private and pre-sale coins sold plus 14% (see capped token supply detail below).

Token holders will have the option to sell tokens privately to other investors via their own agreed upon price. This may be advantageous if the perceived token value is greater than the current listed value because of expected continuing returns and lack of token supply. In this scenario sellers may garner a higher than listed price for their tokens. In other words, a supply squeeze is probable given the software's baseline expected return rate and continual performance improvement (common in machine learning).

An initial 60-day lock up is required on all private and pre-sale token issuance to allow time for the software to establish a positive cash flow. After the 60-day lockup we will facilitate cashing out from treasury funds upon request.

The estimated software return is 100-200% per annum. Estimated possible return can be as low as 50% and as high as 2000% in a best case scenario.

Coin Distribution - Private Sale, Pre-sale, Supply Cap

The tokens will not be traded on a public crypto exchange and as mentioned above the supply of XOIL will be capped.

There will be two private sale rounds each lasting one week. The first will start April 4, 2022. Each of two private sale rounds will limit the number of investors at a fixed amount per investor. The two private sale rounds will immediately be followed by four public pre-sale rounds also lasting one week each. Private and public pre-sale rounds will occur Monday 9 AM EST and end Saturday 5 PM EST.

Each public pre-sale round will be capped with a total dollar limit for that round (not per investor as there is no cap per investor in public pre-sale rounds), which will increase along with the token price each round. Once an investment limit is reached at each level or the week duration expires, the round is complete.

The public pre-sale will close 5 PM EST on May 14, 2022. The supply of XOIL will then be capped, tokens will be distributed and the software will start trading May 16, 2022.

This pre-sale structure is designed to create demand while ensuring that the majority of tokens will be purchased during the highest priced round. As a result, token price at launch will be supported by available treasury funds and a significant drop in price will not occur after launch (avoiding typical ICO trading volatility post pre-sale).

Project Sales Schedule(s)

Project 1 - \$XOIL Coin (Sale Structure)

- \$WOIL not shown (50K minimum, participants pay 1.00 USD per coin presale)

Apr 4 **Private Sale Round 1** (30 Token holders at 5,000.00 USD)

MAXIMUM 30 Participants SET AMOUNT PER 5,000 USD 30 US Cents 150,000

Apr 11 **Private Sale Round 2** (90 token holders at 5,000.00 USD)

MAXIMUM 90 Participants SET AMOUNT PER 5,000 USD 60 US Cents 450,000

Apr 18 **Presale Round 1** (Raise limit 1.35M at minimum 500 USD each, equivalent to 270 @ 5,000 USD but there is no maximum limit to token holders as in private sale round 1 and 2)

MAXIMUM RAISE 1.35M USD MINIMUM PER 500 USD 70 US Cents 1,350,000

Apr 25 **Presale Round 2 (Minimum Goal Level)** (Raise limit 4.05M at minimum 500 USD each, equivalent to 810 @ 5,000 USD but there is no maximum limit to token holders as in private sale round 1 and 2)

MAXIMUM RAISE 4.05M USD MINIMUM PER 500 USD 80 US Cents 4,050,000

May 2 **Presale Round 3** (Raise limit 12.15M at minimum 500 USD each, equivalent to 2430 @ 5,000 USD but there is no maximum limit to token holders as in private sale round 1 and 2)

MAXIMUM RAISE 12.15M USD MINIMUM PER 500 USD 90 US Cents 12,150,000

May 9 **Presale Round 4** (Raise limit 36.45M at minimum 500 USD each, equivalent to 7290 @ 5,000 USD but there is no maximum limit to token holders as in private sale round 1 and 2)

MAXIMUM RAISE 36.45M USD MINIMUM PER 500 USD 100 US Cents 36,450,000

May 15 **Token Distribution**

Total sold in private sale and presale +14% will be the capped supply.

Tokens distributed to holders.

May 16 Project Open

Project 2 –

Private Sale Round 1 (120 Token holders at 5,000.00 USD)

MAXIMUM 120 Participants SET AMOUNT PER 5,000 USD 30 US Cents 600,000

Private Sale Round 2 (360 token holders at 5,000.00 USD)

MAXIMUM 360 Participants SET AMOUNT PER 5,000 USD 60 US Cents 1,800,000

Presale Round 1 (Raise limit 5.4M at minimum 500 USD each, equivalent to 1080 @ 5,000 USD but there is no maximum limit to token holders as in private sale round 1 and 2)

MAXIMUM RAISE 5.4M USD MINIMUM PER 500 USD 70 US Cents 5,400,000

Presale Round 2 (Minimum Goal Level) (Raise limit 16.2M at minimum 500 USD ea., equivalent to 3240 @ 5,000 USD but there is no maximum limit to token holders as in private sale round 1 and 2)

MAXIMUM RAISE 16.2M USD MINIMUM PER 500 USD 80 US Cents 16,200,000

Presale Round 3 (Raise limit 48.6M at minimum 500 USD each, equivalent to 9720 @ 5,000 USD but there is no maximum limit to token holders as in private sale round 1 and 2)

MAXIMUM RAISE 48.6M USD MINIMUM PER 500 USD 90 US Cents 48,600,000

Presale Round 4 (Raise limit 145.8M at minimum 500 USD each, equivalent to 29160 @ 5,000 USD but there is no maximum limit to token holders as in private sale round 1 and 2)

MAXIMUM RAISE 145,800M USD MINIMUM PER 500 USD 100 US Cents 145,800,000

And so on... repeating the structure above.

Project 3 –

Private Sale Round 1

MAXIMUM 480 Participants 5000.00 USD 30 US Cents 2,400,000

And so on...

Project 4 –

Private Sale Round 1

MAXIMUM 1920 Participants 5000.00 USD

30 US Cents 9,600,000

And so on through 6 or more projects in suite...

Investor Referral Bonus & Investor Round Structure in Projects Moving Forward

A referral commission bonus award is available to round 1 private sale investors. A minimum of 3 referrals is required to receive the commission bonus equal to 10% of the total invested amount of referrals. There is no upper limit on the number of referrals but there will be a maximum of 90 private-sale round 2 investors. When the private sale round 2 spots fill, no further commissions will be awarded on the project.

Commission bonuses will be paid in the appropriate value of tokens, 60 days after the last public pre-sale round closes.

Round 1 private investors who refer a minimum of 3 additional private investors will automatically be offered entry in to the next private sale round 1 project offering. Round 2 private sale investors will be offered entry into round 1 of the 2nd project and each project forward - they will then be eligible for a commission bonus for referring new investors in project 2 and so on. The result will be 120 investors in round 1 of project 2 and 360 investors in round 2 of project 2 and so on.

This structure will continue through the suite of 6 projects or more and will create a loyal group of investors. It will accelerate growth and contribute to the longevity of these projects.

Management Fees

Software licensing charge (rake) charged to software returns is 9.16%. For example, if total amount invested is 3 million and software returns 100%, rake is 9.16% of 3 million or 274,800. The token holders would then receive a 91.84% return on their investment.

There will be a one-time development team charge of 6.5%, marketing and sales commission of 3.5%, plus bonus investor commissions for round 1 investors, administrative fees and miscellaneous promotional tokens of 4% for a TOTAL ONE-TIME charge of 14% to the treasury. This equates to approximately 1 month of average software returns.

It is important to emphasize the software rake will only be taken from realized software returns and not from invested principle.

With WOIL there will be no pre-sale limit, no dollar limit and \$50,000 minimum entry. Fees for XOIL and WOIL are mostly the same. The one exception is no 4% charge for investor referral commission bonus and promotional tokens.

The software-rake and other fees will be the same as XOIL. Thus, WOIL investors will pay a 10% ONE-TIME fee from the treasury (6.5% team development + 3.5% sales and marketing), and continuous 9.16% rake on

software returns and inconsequential administrative support costs to run platform.

Value to Token Holders

A 'low barrier to entry' stake in machine learning trade software (technology and account size both matter) that is not other-wise accessible to the public.

Value of existing software technology – developed and tested over 6 years - now proven and fully functional.

Returns estimated 50% - 2000% per year (see software white paper for detail).

Returns not otherwise accessible to the everyday investor.

Token swaps within our suite of offerings - project to project.

End to end privacy via DERO and XMR and anonymous exchange with us (we will continue to adapt to available technologies to maximize security and ease of use with the available private currencies).

Private sale structure - moving pre-sale round 2 investors to round 1 of the next project on each occasion.

Fixed total supply of XOIL - Potentially rising underlying value of tokens relative to future considerations of machine learning software provide for private person to person sales of tokens at whatever that perceived value may be. A very real scenario could occur in an off market value squeeze of tokens.

No risk of getting dumped on because token value is correlated with trading returns and our reported token price is backed by total value of the treasury.

Liquidity for token sales is guaranteed because tokens are sold directly with our treasury and do not require a third party buyer. We will always purchase tokens from the seller at our listed token price after the 60-day lock period. Price is guaranteed to be directly correlated to software trading returns.

Contact Our Support Team Here to get Started:

Use Session Application: <https://getsession.org/>

Session ID:

0507854bc578e152a86d3c470b7c08b2eae46bb6c31de2190fe78fd4bc0020627d or search 'XOIL' on Session

GUIDE TO PURCHASING XOIL and WOIL

we recommend downloading all applications on the same PC for ease of use

supported operating systems for all applications include OSX, Windows, Linux, and some Android devices

REQUIRED APPLICATIONS

1) Session Messaging App - <https://getsession.org/download>

-contact us at Session ID:

0507854bc578e152a86d3c470b7c08b2eae46bb6c31de2190fe78fd4bc0020627d

or: XOIL

Always double check the above alpha-numeric address when contacting us.

This is the ONLY session address you should be communicating with in regards to XOIL and WOIL.

2) DERO command line interface wallet - <https://dero.io/download.html>.

Refer to the DERO wallet setup document for your operating system.

Over time DERO wallets will become significantly more user friendly.

3) XMR wallet of your choice.

For privacy, ALWAYS transact XMR using a personal wallet, never an exchange.

There are several XMR wallets to choose from for PC and/or mobile devices.

Recommended PC Wallets (these support all major operating systems):

1) Official Monero GUI Wallet - <https://www.getmonero.org/downloads/>

2) MyMonero Wallet - <https://mymonero.com/>

3) Exodus Wallet - <https://www.exodus.com/>

- Exodus can be used with many different cryptocurrencies

Recommended Mobile Wallets

1) Cake Wallet

2) Edge Wallet

3) MyMonero Wallet

STEPS TO PURCHASE XOIL AND WOIL TOKENS

1) Purchase desired amount of XMR at your preferred exchange (some of the above apps support conversion from BTC or LTC or other coins to XMR within those wallets).

- KYC Exchanges – Binance, Kraken.

- non-KYC Exchanges – Kucoin, Trade Ogre.

2) Send XMR to your personal wallet from your exchange.

3) Ensure your DERO wallet is open and registered.

4) Ensure your XMR wallet is open and desired amount is available for transfer.

5) Contact us on Session.

6) Send the appropriate amount of XMR to the XMR address you will be given.

7) Copy and paste your DERO address into the Session conversation.

8) XOIL tokens will be distributed during the week of May 16-May 20.

WOIL tokens will be distributed immediately after purchase.

*** Prior to contacting our sales team to execute purchase of tokens ensure you have your desired amount of XMR to invest in a personal XMR wallet and that you have a fully registered DERO wallet address. If you require assistance for this process our team will also assist you.*

*** The DERO network is still very young and developing quickly. It was chosen for this project as it is the most private network available for token creation and distribution. It will become more streamlined as time goes on. Our team believes in privacy by default at the protocol level and by using the best technology available we hope to aid in advancing its widespread use.*

*** Due to mechanics of this project, cashing in a larger number of tokens may take up to one week.*

*** Our team can facilitate private exchanges between two parties if desired - contact us for more information.*

“All things are possible, be the impossible.”
